Round 1: Aptitude Test (30 min. 30 MCQ)

- Accuracy and speed plays a major role because questions were easy and approachable for every student.
- Along with DSA and other subject aptitude is also very important try to practice half an hour daily.
- I used to give practice test of 20 min. daily while preparing for placement.
- You can practice on IndiaBix.
- 32 students were shortlisted for next round, among them 6 were from MCA.

Round 2: Group Discussion (30 min)

- This round was basically to test the communication skills.
- 4 groups were made each consist of 8 students.
- A topic was given to each group and they have to discuss about it among the group members.
- Try to speak whatever you think. Don't be quiet. Try to involve yourself in discussion.
- Confidence and communication skills plays a major role in such rounds.

Round 3: Programming Test

- All 32 students had to give this test.
- 3 easy programming questions were given and we were told to write code for these from scratch.
  1. Reverse a number. (Question was very easy but they were checking for efficient solution that can pass edge case)
  2. Find smallest divisor other than 1.
  3. Implement hash search from scratch.
- Try to remember all header files and practice to write code from scratch.
- Luckily I was first one who coded all questions before time. So one of them asked me some questions based on this 3 questions and also told me to code when they change some conditions in the questions. I was able to solve that too.
- 7 students got selected after this round.

Round 4: HR

- This round was just to congratulate us that we have got placed. They asked if we have any questions. It was not an eliminating round, but just a formality.
- All 7 students were selected and among them 3 were from MCA.
